

I dedicate my paintings to the healing of our environment. It is crucial that we honour the earth as sacred and protect our air and water; our lands, forests, and oceans; our wildlife; our children's future; and our planet's climate. I try to express that love of nature in my "Impressions of Nature" These paintings reflect the many facets of nature one can find and enjoy in the natural forests of Canada. In Ontario the Georgian Bay in the area of Parry Sound and the lakes of Muskoka has been a particular inspiration.

Terry will be offering his workshop on **Thursday March 17** from 9:30 to 4:30 at the Signal North Gallery, as part of **The Art Sampler Workshop Series**
